

RESKILL WALES · 5-DAY BOOTCAMP

Power Platform & Low-Code Automation Bootcamp

Build business apps without code. Five days. Five outcomes.
One transformed career.

www.reskillwales.co.uk · 01656 737349

01 · THE COURSE

What this course does

Power Apps + Power Automate + AI Builder — automating the spreadsheets, approvals and tracking that eat your team's week. You leave with working solutions, not slideware.

5

days of training

5

real outcomes

50%

hands-on labs

Five days. Five outcomes.

DAY

01

Power Apps Fundamentals

Your first business app,
built from scratch

DAY

02

Power Automate Workflows

Approvals, alerts and data
moved automatically

DAY

03

Power BI Integration

A live management view
of everything

DAY

04

AI Builder & Advanced

Documents read and
predictions made by AI

DAY

05

Governance & Showcase

Production-ready, secure
and presented

Mornings are taught sessions · Afternoons are hands-on labs where you build something real

03 · HOW IT WORKS

Learn it, then build it

MORNINGS · TAUGHT SESSIONS

Guided instruction, live demos and the concepts behind every feature you will use.

AFTERNOONS · HANDS-ON LABS

You build something real — on your own screen, with your trainer beside you.

Every day ends with a working solution you can take back to work.

DAY

01

Power Apps Fundamentals

Your first business app — built from scratch, connected to real data, working on desktop and mobile.

Power Apps canvas vs model-driven

Screens, galleries & forms

Building your first app

Input controls & validation

Data sources: SharePoint, Excel, Dataverse

Mobile-responsive layouts

LAB

Build a staff directory app connected to SharePoint

DAY

02

Power Automate Workflows

Automate the repetitive tasks that waste hours every week — approvals, notifications, data movement, file management.

Flow types & triggers

Scheduled automations

Approval workflows

Conditional logic & branching

Email notifications

Error handling

LAB

Build a three-stage approval workflow with email notifications

DAY

03

Power BI Integration

Connect your apps and automations to visual dashboards — the management view of everything your systems do.

Power BI basics recap

KPI cards & visualisations

Connecting Power BI to Power Apps data

Sharing & embedding reports

Real-time dashboards

Row-level security

LAB

Create a live dashboard for your Power Apps data

DAY

04

AI Builder & Advanced Features

Add AI to your apps — document processing, prediction, object detection — without any machine learning knowledge.

AI Builder overview

Text classification

Document processing models

AI Builder in Power Automate

Prediction models

Custom connectors

LAB

Build an AI-powered document processing workflow

Governance, Deployment & Showcase

Production-ready. Environment management, security, ALM, and presenting your solution to stakeholders.

Environment management

ALM & version control

Data loss prevention policies

User training & adoption

Solution packaging

Stakeholder presentations

CAPSTONE

Present your complete Power Platform solution

Five days, five things you keep

- 01 A staff directory app connected to SharePoint
- 02 A three-stage approval workflow with email notifications
- 03 A live dashboard reporting on your Power Apps data
- 04 An AI-powered document processing workflow
- 05 A complete solution, packaged and presented

Who it's for, what to bring

WHO IT'S FOR

- Anyone drowning in spreadsheets and manual tracking
- Team leads automating approvals and reporting
- Analysts and admins ready to build, not just request

WHAT YOU NEED

- A laptop and a Microsoft 365 account
- No coding experience required at all
- Comfort with Excel or SharePoint is a bonus

WHAT YOU LEAVE WITH

- Five working solutions built by you
- A repeatable approach to automating work
- The confidence to ship apps at work
